ABOUT US

Unigen Seeds Spain belongs to the US company United Genetics Seeds Co., which in turn is integrated into the Japanese group Kagome.

Unigen Seeds Spain operates in the domestic and international markets with the brands AKIRA SEEDS and UNIGEN SEEDS.

Our focus is to develop varieties with better quality, resistances and functional food application as well as greater productivity. At our research centers in the United States, Europe, the Middle East and Asia, we use traditional breeding techniques supported by advanced technologies to create unique products on the market.

We are pleased to present you our wide portfolio of tomato varieties in all types and colors, including our latest developments in heirloom tomatoes.

B E E F

EXCALIBUR F1

- Very firm and uniform fruits, large size (+250 g).
- Outstanding red color both outside and inside.
- Excellent yielder.
- Compact plant, good cover.
- Structural Long Shelf Life (LSL).
- Tolerant to TYLCV.
- HR*/IR*: V, Fol:0-1, Pst, TYLCV.

GLOBE TROTTER F1

- Very productive variety, high resistance to TYLCV.
- Vigorous and well covering plant.
- Extra firm globose fruits with slight green shoulder.
- Weight: 300-350 g.
- Pulpy and multilobed fruits, with small blossom scars.
- HR*/IR*: V, Fol:0-1, N, Pst, TYLCV.

BEEF

TROPICAL GEM F1

- Compact, rustic plant that adapts well to normal cultivation practices.
- Very high production potential.
- Deep globe shape, big sized (250 g average).
- Structural Long Shelf Life (LSL).
- Excellent flavor.
- Also adapted to tropical conditions.
- HR*/IR*: V, Fol:0-1, N, TYLCV.

TYKING F1

- Compact plant, good cover.
- Consistent, very uniform fruits. Flattened globular shape and juicy flesh.
- Weight: 250-300 g.
- Excellent quality, very attractive color.
- The Long Shelf Life character provides the variety with excellent resistance to overripening.
- HR*/IR*: V, Fol:0-1, N, TYLCV.

MINI

Mini plum

BRISCOLINO F1

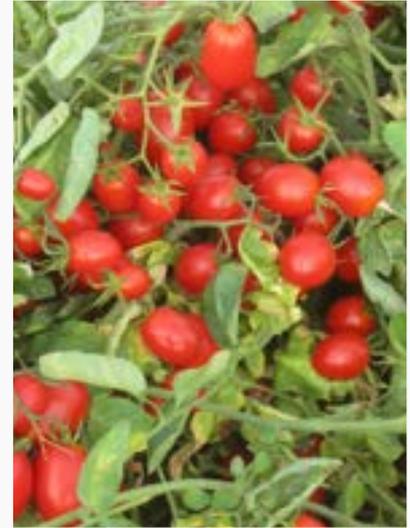

- Plant with very good cover and high yield under all conditions.
- Jointless character, very firm and uniform fruits, resistant to cracking.
- Weight: 20-25 g.
- Deep and bright red color.
- 7-7.5° Brix.
- Excellent both for fresh and processing market.
- HR*/IR* : V, Fol:0-1, Pst, TSWV.

Minimarzano

CESARINO F1

- Suitable for all processing purposes.
- Very early cycle.
- Very firm fruits, 25-30 g.
- Outstanding resistance to overripening.
- 6.5-7° Brix.
- Fruits with jointless character and ripening uniformity, excellent for mechanical harvesting.
- HR*/IR*: V, Fol:0-1, Pst, TSWV.

Cherry plum

DATTERINO F1

- Firm and uniform fruits of deep red color, no cracks.
- Outstanding flavor.
- Weight: 15 g.
- 7-8° Brix.
- Excellent yielder.
- Plant with good cover.
- J2 fruits, easy harvest.
- Excellent for whole canning.
- Suggested plants / hectare: 33,000-35,000.
- HR*/IR*: V, Fol:0-1, N, Pst.

MINI

Cocktail

KIMBERLINO F1

- Rustic and compact plant, good cover.
- Very productive variety with excellent organoleptic features.
- Uniform fruits of deep red color.
- High yielder.
- Weight: 25-30 g.
- 6-6.5° Brix.
- Suitable both for fresh and processing (puree, semi-dry, dry tomato) market.
- Due to its multi-purpose ability, the variety has got very good acceptance in all markets.
- HR*/IR*: V, Fol:0-1, Pst, TSWV.

Cherry

STROMBOLINO F1

- Suitable for processing market and fresh consumption.
- Perfectly round tomatoes in clusters of 7-8 fruits, deep red color.
- Weight: 15-18 g.
- Outstanding firmness and resistance to overripening.
- Exceptional lycopene content, color, Brix and viscosity.
- Healthy plant thanks to good vigor and optimal fruit cover.
- Excellent yielder.
- HR*/IR*: V, Fol:0-1, N, Pst, TSWV.

SALADETTE

BIG RIO 2000 F1

- Dual purpose hybrid.
- Very early cycle.
- Very productive, mid vigor compact plant with very good cover.
- Oval-square shape, fleshy and pulpy fruits.
- Weight: 120-150 g.
- Nice bright red color when fully ripe.
- Firm fruits, excellent long shelf life.
- Very good adaptability to hot climate areas.
- HR*/IR* : V, Fol:0-1, N, Pst.

DURPEEL F1

- Dual purpose hybrid: fresh and processing market.
- Mid cycle.
- Vigorous but compact plant, good cover. High yielder.
- Big sized fruits (100-110 g, also 130-150 g), deep red color.
- Very pulpy and thick fruits, suitable for canning, peeling and dried tomato.
- Uniform ripening, suitable also for mechanical harvest.
- HR*/IR* : V, Fol:0-1, N, Pst, Lt, TSWV.

JUPITER F1

- Multiple purpose: fresh market, dried tomato and canning.
- Mid cycle.
- Vigorous, rustic and healthy plant. High yielder.
- Pulpy and elongated fruits, deep red color.
- Intermediate resistance to Leveillula Taurica (powdery mildew).
- Good performance at high temperatures.
- HR*/IR* : V, Fol:0-1, N, Pst, Lt, TSWV.

SALADETTE

MASSARO F1

- Suitable for processing peeled but also for fresh market and "sun dried" tomato.
- Mid-early cycle.
- Vigorous, compact plant. Concentrated ripening.
- Elongated, cylindrical and uniform fruits, 85-90 g. Deep red color when fully ripe.
- Suitable for mechanical harvest due to resistance to overripening and firmness.
- HR*/IR*: V, Fol:0-1, N, Pst, TSWV.

YELLOW RIVER F1

- Successful yellow hybrid.
- Yellow color remains even when fully ripe, with no need to use antioxidants or other substances.
- High content in vitamin C and beta carotene, very interesting product also for organic production.
- Weight: 70-80 g.
- Very good field resistance to overripening.
- Suitable for mechanical harvest.
- HR*/IR*: V, Fol:0-1, N, Pst.

ZAPATECO F1

- Multiple purpose: fresh market, dried tomato and canning.
- Mid-early cycle.
- Vigorous, compact and very productive plant with good cover. Always healthy due to the resistance package.
- Elongated, firm and uniform fruits, deep red color.
- Good pulp thickness.
- Weight: 100-120 g.
- Suitable for all climates.
- HR*/IR*: V, Fol:0-1, N, Pst. Lt, TYLCV, TSWV.

TOMATO

DETERMINATE

Saladette
PIKTORUM F1

- Early cycle variety, outstanding field holding ability.
- Very vigorous and healthy plant, excellent cover.
- Fruits of attractive bright red color, average weight 150 g. Bottom fruits can be over 200 g in optimal crop conditions.
- Highly reliable variety. Outstanding features: color, hardness, size, very high yield and outstanding resistance package including transport.
- HR*/IR*: ToMV (1-3), VaVd, Fol:0, TYLCV, TSWV, ToTV.

Unigen Seeds

B E E F

AK TIO 834 F1

- Excellent flavor.
- Suitable to harvest when starting ripening or in red.
- Large-caliber, homogeneous fruits with beautiful locules.
- Vigorous and healthy plant.
- HR*/IR*: TMV, N, TYLC, V, F.

AK TIR 582 F1

- Early cycle.
- Striking pink color.
- Rustic plant, mid internodes.
- Firm fruits, 150-220 g.
- 5-6 fruits per cluster.
- HR*/IR*: V, Fol:0-2, TSW, TYLC, ToMV, N, C5, STM.

ATAKAN F1

- Variety for spring.
- Average weight: +250 g.
- Very firm fruits, resistant to transport, long shelf life.
- Suitable for open field and greenhouse.
- HR*/IR*: V, Fol:0-2, N, ToMV, TYLCV, TSW.

B E E F

MITO F1

- Suitable for open field and protected cultivation.
- Rustic and vigorous plant, excellent yielder.
- Very firm and uniform fruits, resistant to cracking. Very good setting ability.
- Very attractive mid-dark green color, turning to deep red when fully ripe.
- Weight: 250-300 g.
- Sweet and crunchy pulp with excellent flavor.
- HR*/IR*: ToMV, Fol:0-1, N, TYLCV, TSWV.

MONTALBAN F1

- Big sized Beef intended for the salad segment.
- Vigorous plant, stops growth in the 7th-8th flower stages.
- Globose, slightly flattened fruits, 250-350 g.
- Very uniform fruits also in the upper clusters.
- Full and juicy pulp.
- Deep red color when fully ripe.
- Excellent variety for growing under plastic, but also suitable for open field.
- HR*/IR*: V, Fol:0-1, Aal.

TROPICAL QUEEN F1

- Suitable for salad segment.
- Harvest when it begins to ripen or in red.
- Mid vigor plant with mid-short internodes and good cover.
- Uniform, globose and slightly flattened fruits.
- Weight: 250-300 g.
- Mid-dark green color turning to an attractive bright red when fully ripe.
- Hybrid for all seasons thanks to the resistance package.
- HR*/IR*: ToMV, V, Fol:0-1, N, TYLCV, TSWV.

TOMATO

INDETERMINATE

Beef
EUFORIA F1

- Vigorous and balanced variety.
- Suitable for open field and greenhouse cultivation.
- Consistent, big caliber fruits (250-400 g), long shelf life.
- Excellent Brix and flavor.
- Bright red color, no green shoulder.
- Slightly flattened shape with nice ribbing.
- Very resistant to cracking.
- HR*/IR*: TYLCV, TSWV, ToMV, VFFN, For.

O X H E A R T

SANREMO #2 F1

- Early cycle.
- Vigorous plant with good fertility also in the highest stages.
- Juicy and sweet fruits, with little acidity, 250-300 g.
- Mid green color with very attractive darker stripes. It turns bright pink and then deep red when fully ripe.
- Excellent for greenhouse in winter and spring crops.
- HR*/IR*: V, Fol:0-1, N, TSWV.

UGI 3329 F1

- Suitable for all cycles in protected cultivation.
- Balanced, airy, generative plant.
- Attractive chocolate color with marked green shoulder.
- Excellent resistance to overripening, long shelf life.
- Weight: 180-250 g.
- Taste profile clearly superior to its typology in sweetness, acidity and juiciness.
- HR*/IR*: ToMV, VaVd, Fol:0-2.

UG 4341 ALBENGA F1

- New variety, unique in its typology.
- Fruits of striking bright chocolate color, solid and very fleshy, 180-230 g.
- Sweet and appetizing flavor.
- Open, balanced, vigorous and very productive plant.
- Excellent holding ability and shelf life.
- Specialty market.
- HR*/IR*: ToMV, TSWV, TYLCV, VaVd, Fol:0-2.

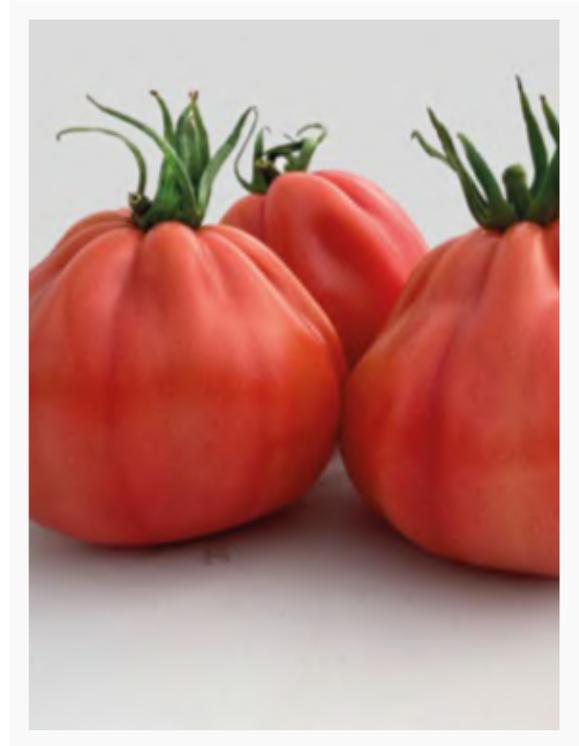

O X H E A R T

DRAKE F1 (UGI 4316)

- For all cycles in protected crop. Particularly suitable in spring-summer even under high light and temperature conditions, with remarkable tolerance to «yellow shoulder».
- Mid-early cycle.
- Balanced, generative plant, with short internodes and contained dark green leaves. Very productive.
- Fruits of 250-300 g, excellent color along the whole cycle.
- Deep ribbing of nice green color.
- Outstanding shelf life.
- HR*: ToMV/VaVd/Fol:0-2. IR*: TSWV.

BARAIRO F1 (UGI 5426)

- Early cycle pink oxheart.
- For all cycles in protected crop. Particularly suitable in spring-summer even in high light and temperature conditions.
- Balanced plant with short internodes and good cover. Excellent yielder. The large size of the fruits remains in the upper stages.
- Deep ribbing and always flat base.
- Excellent color in all ripening stages.
- Very large and attractive sepals.
- Optimal holding ability and shelf life.
- HR*: ToMV, VaVd. IR*: TSWV.

TOMATO

I N D E T E R M I N A T E

Oxheart
KOKORO F1

- Mid cycle hybrid, adapted to all cycles in protected cultivation, both in spring-summer and autumn-winter.
- Balanced and very productive plant, with good setting ability at high temperatures.
- Stable and uniform fruits also in the upper stages, with optimal ribbing and flat bottom.
- Good coloring with not too marked green shoulder.
- High fruit caliber throughout the production cycle. Average weight: 300 g.
- Reduced placental cavity compared to the average for its type.
- Slow turning both in plant and post-harvest.
- HR*/IR*: ToMV, ToTV, VaVd, TSWV.

MINI

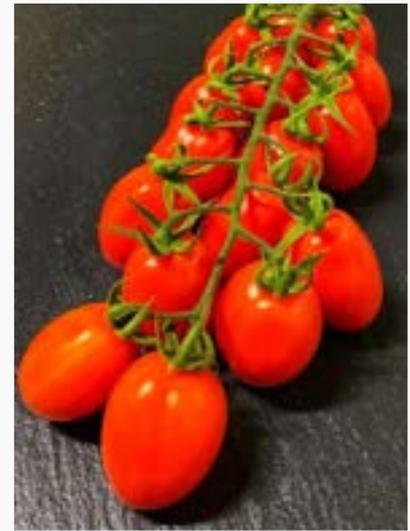

Cocktail plum
ATOMIC

- Sweet and elongated fruits, pointed at the bottom.
- Weight: 30-40 g.
- Incredible range of colors, from green, purple, brown and black to orange, with chocolate blue stripes when fully ripe.
- Olive green color inside the fruits, turning to red when fully ripe.
- Very productive variety, adapted to most climates and soil types.

Cherry
BOTTONDORO F1

- Vigorous, very productive variety.
- High sugar (9° Brix) and beta carotene content.
- Good flavor and texture, excellent when eaten fresh from the plant.
- Round fruits of 15-20 g and deep orange color.
- It is advisable to grow in spring-summer-autumn.
- Suitable for protected crop.
- HR*: Fol:0-2, Verticillium and Bacterial spot.

Mini plum
BRIXI F1

- Spine pattern, 16-18 fruits per cluster.
- Early cycle.
- Excellent red color.
- Length 42-45 mm / diameter 25-30 mm.
- Weight: 20-25 g.
- Very good setting and storage ability.
- 8-10° Brix.
- Suitable for cluster harvest and winter crop.
- HR*/IR*: Fol:0, ToMV, TYLCV, MaMiMj.

MINI

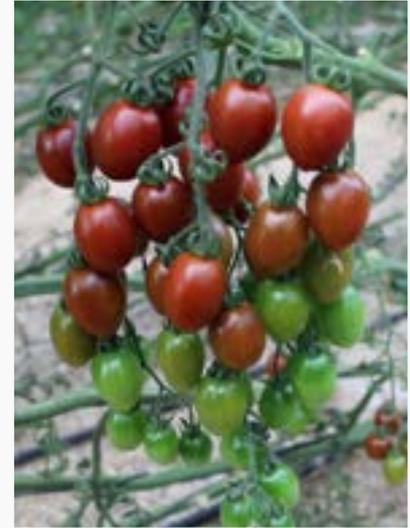

Cherry plum
KUBANITO F1

- Excellent flavor.
- Vigorous, rustic plant for long cycles in autumn/winter - spring/summer.
- Variety with larger caliber than our leader Morenito, it can reach 30 g.
- Commercial caliber ideal for the east of Almeria and Murcia, which stays the same in cold temperatures.
- Easy-to-use plant, which also allows calibers for export.
- HR*: TMV, VaVd.

Cherry plum
MARILYN F1

- Suitable for loose harvest but also in cluster.
- Striking and uniform deep yellow color.
- Very vigorous plant.
- Weight: 20-25 g.
- Very sweet fruits, 12° Brix (it may reach 14°).
- Cracking resistant.
- Due to its high vigor, it is ideal for long cycles, maintaining the caliber throughout the crop.
- IR*/HR*: TMV, V, For.

Cherry plum
MORENITO F1

- Very uniform variety with high Brix (7-8°).
- Sweet and crunchy bite.
- Optimal caliber 22-25 mm. Chocolate brown color when starting ripening, then very attractive deep red.
- Good setting ability under cold conditions.
- Balanced plant.
- Recommended for transplants from mid August to September for long cycles.
- HR*: TMV, Verticillium.

MINI

Cherry plum
ORANGINO F1

- Striking orange color.
- Very healthy plant, excellent holding ability in long cycles.
- High yielder. Very few fruits are discarded, since the number of fruits per cluster is adequate so that all the fruits are commercial.
- Weight: 15-23 g.
- +7.7° Brix.
- HR*/IR*: ToMV, Va,Vd, Pst, Ma,Mi, Mj.

Cherry
SASSOLYNO F1

- Mainly for cluster harvesting, suitable for open field and greenhouse.
- Deep red fruits, 15-18 g, excellent flavor.
- Clusters tend to fork without elongating too much.
- Excellent yielder.
- High Brix in all growing conditions.
- HR*/IR*: ToMV, VaVd, Fol:0-1.
- IR*: TSWV, Ma,Mi,Mj.

Mini plum
SUKITA F1

- Excellent, extra early and very uniform variety.
- For autumn/winter cycle.
- Good plant balance, easy harvesting.
- Strong plant for greenhouse cultivation in spring-summer.
- Fruits of deep bright red color, 20-22 g.
- Amazing double cluster.
- HR*/IR*: ToMV, TYLCV, Fol:0-1, For, MaMiMj.

M I N I

Cocktail plum
TIGRELLA

- Nice chocolate color. Tiger Brown variety.
- Very vigorous, healthy plant.
- Elongated fruits, attractive pointed ending. Very fleshy and crunchy.
- Weight: 30-40 g.
- Light, pleasant bittersweet flavor.
- Good setting even at high temperatures. No cracking.
- Long shelf life.

Cherry plum
UGI 6124 F1

- Excellent flavor.
- For growing all year round.
- Mid-early cycle.
- The beautiful blue-black color is due to the concentration of anthocyanins.
- Very healthy and vigorous plant, easy to manage.
- Weight: 15-20 g.
- 8-9° Brix.
- HR: ToMV/VaVd/Fol:0-1/For.
- IR: MaMiMj.

Cherry
UGI 1560 F1

- Suitable for open field and greenhouse.
- Vigorous, balanced and very productive plant.
- Very firm and bright fruits.
- Weight: 16-18 g.
- 8-9° Brix.
- Suitable for cluster harvest.
- Optimal split of long clusters, dark green sepals.
- HR*/IR*: ToMV, Fol:0-1, For, TYLCV, On, MaMiMj.

MINI

Mini plum

UGI 3171 F1

- Tiger Brown mini plum.
- Very attractive colors.
- Healthy, vigorous and very productive plant.
- Variety for loose harvest.
- Elongated and crunchy fruits keeping caliber in the upper stages. Great consistency.
- Very peculiar and pleasant to the palate.
- +9° Brix.
- Weight: 30-40 g.
- Long shelf life.
- HR*/IR*: ToMV, VaVd, Fol:0-1.

Cherry plum

YELLOW TEAR DROP

- Nice yellow color.
- High yielder.
- Very easy to produce.
- Vigorous plant, keeping calibers in the upper stages.
- Very uniform and sweet fruits with a beautiful teardrop shape, 8-9° Brix.
- Clusters can reach more than 20 fruits.
- Excellent setting under high temperatures.
- Long shelf life.
- Very resistant to cracking.

Mini plum

ZANNYNO F1

- Mid-early cycle. For all cycles in protected cultivation.
- Rustic and constant plant, high yielder.
- Optimal tolerance to both cold and heat.
- Bright red fruits with crunchy flesh of about 20 g, in regular, often multiple clusters.
- Fleshy rachis and sepals, with high resistance to detaching from the cluster.
- HR*: ToMV/VaVd/Fol:0,1/Ff:A-E.
- IR*: TYLCV/TSWV/On/Ma, Mi, Mj.

TOMATO

INDETERMINATE

Cherry plum
BUKANITO F1

- Brown cherry plum with excellent flavor, 7.7° Brix.
- Plant with short internodes, ideal for early transplants in autumn-winter cycle and for transplants facing summer.
- It stands out for its long life and for being able to be harvested already ripe. This benefits the producer, since he does not need to harvest so often.
- The clusters are open, which makes this variety very productive.
- Another advantage of this tomato is its earliness.
- HR/IR: TMV; TYLCV; Ss.

S A L A D E T T E

AGATOS F1

- San Marzano type.
- Early cycle.
- For autumn-winter cycles in protected crop.
- Rustic, vigorous, balanced plant.
- Typical shape of its type.
- Uniform and regular setting up to the highest stages.
- Very attractive deep red color when fully ripe.
- Weight: 150-180 g.
- Thick pulp.
- Excellent shelf life.
- Harvest both loose and cluster, green or red.
- HR*/IR*: ToMV, VaVd, Fol:0-1, TSWV, MaMiMj.

BAKARA F1

- Double purpose: salad and cluster in red.
- Full, consistent and uniform fruits of 110-160 g. Very resistant to transport.
- Fleshy, dark green and persistent rachis.
- Fruits of deep green color to bright red when fully ripe.
- Balanced, very vigorous and productive plant.
- Clusters of 6-8 fruits, many are double.
- No blossom end rot.
- Suitable for spring/summer and autumn cycle in protected cultivation.
- HR*/IR*: V, Fol:0-1, N, TYLCV.

BOBBY F1

- Variety recommended for short cycle.
- Good vigor plant with mid internode.
- Weight: up to 290 g.
- Good setting, mid red color.
- No green shoulder, very good performance against cracking.
- Fruits are very tolerant to blossom end rot, suitable for strong soils.
- High holding ability without softening.
- Long shelf life.
- Resistant to hollowness.
- HR*/IR*: ToMV, TYLCV, Fol:0-1, For, MaMiMj.

OTHER TYPES

Marmande

BRUMANDE F1

- Adapted to all cycles in protected crop.
- Balanced and very productive plant.
- Good setting ability even at high temperatures.
- Stable and uniform fruits also in the upper stages. Weight: 120-180g.
- Excellent ribbing, good color with green shoulder not too marked.
- It can be harvested even when fully ripe.
- HR*/IR*: ToMV, VaVd, TSWV, On, MaMiMj.

Cuerno de los Andes

NASONE F1

- "Pepper" type fruits that can reach 15-18 cm length.
- Recommended for spring-summer crop.
- Fleshy and sweet fruits due to its low acidity.
- Weight: 150-230 g.
- Use for salad when turning red.
- Vigorous plant.
- Suitable for open field and protected cultivation.
- HR*/IR*: TMV, V, Fol:0-1.

TOMATO

INDETERMINATE

To spread bread / Flavor

SUKAPINK F1

- Suitable for open field and protected cultivation.
- Balanced plant with mid-high vigor.
- Small-mid (50-110 g) consistent fruits, high Brix 6.5-7.5°.
- Striking bright pink color with no green shoulder.
- Idoneous for spreading bread and also in fresh thanks to its excellent flavor.
- Long shelf life (1 month), high resistance to cracking.
- For cluster harvest or loose with the calyx, which makes the fruit more attractive.
- HR*/IR*: ToMV, TYLCV, TANV, MaMiMj.

Unigen Seeds

OTHER TYPES

Marmande

UG 5401 F1

- Slight and particular ribbing, with marked green shoulders.
- Sweet fruits with an attractive chocolate color and an acidic touch that is very pleasant to the palate.
- Very healthy and vigorous plant. Good calibers in the upper stages.
- Cracking resistant.
- HR*/IR*: ToMV, VaVd, Fol:0-2.

Loose

UGES 3202 F1

- Long shelf life round tomato.
- Nice deep red color.
- Very firm and homogeneous fruits, high yield.
- Very uniform caliber (GG), very little tomato for waste.
- Open and airy plant.
- HR*: ToMV, ToTV, Va:0/Vd:0, Fol:0-1.
- IR*: TYLCV, TSWV, Ma,Mi,Mj, On.

Ethnic Tomatoes

ABORIGEN F1

- Ribbed Ananas type.
- Mid internode plant with mid vigor that is recommended to graft for mid-long cycles.
- Large caliber fruit (G/GG), ideal for adding color to tomato mixes.
- Very sweet ananas flavor when fully ripe.
- IR*: TBRFV, TYLCV.

BLACK BULL F1

- Black Marmande.
- Mid internode plant with low vigor, recommended to graft for mid-long cycles.
- Large caliber fruit (G/GG) with big floral branch that needs to be handled properly to get few fruits (3 or 4) and maintain the caliber.
- IR*: TBRFV, TYLCV.

NATIVO F1

- Tiger type.
- Mid internode plant with low vigor, recommended to graft for mid-long cycles.
- Large caliber fruit (G/GG) with big floral branch that needs to be handled properly to get few fruits (3 or 4) and maintain the caliber.
- IR*: TBRFV, TYLCV.

HEIRLOOM

Big Bonet

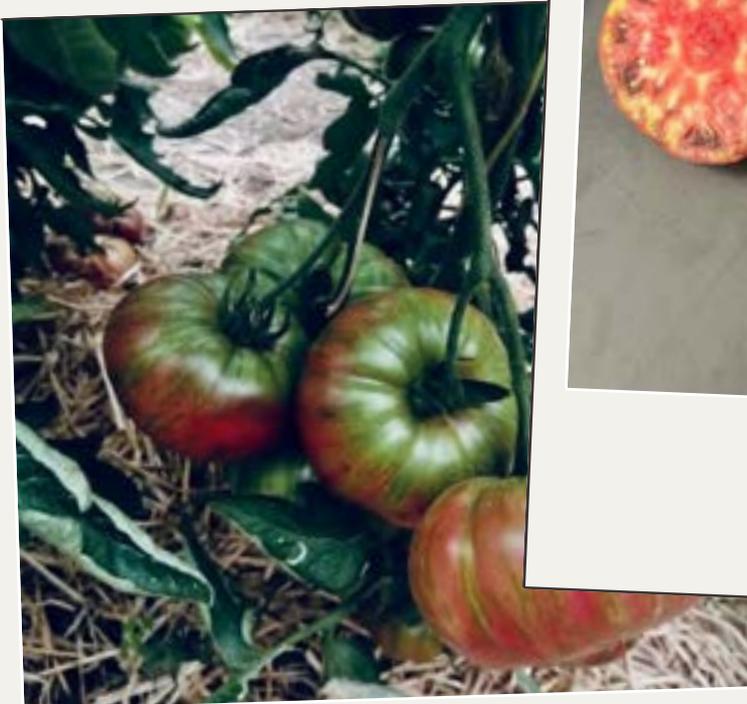

Possibly, the BIGGEST TOMATO IN THE WORLD
(from 500 g to 3 kg)
Nice heart shape
